ABOUT

The Big Cats BSC project is a community-focused, decentralized and rewarding project owned by the community.

It's aim is to make cryptocurrency and its benefits available to everyone. The Big Cats BSC project was inspired from the uniqueness and characteristics of the big cat (Tiger).

Legendary for their agility, intelligence, and strength, the Big Cats are distinctively unique from the rest of other living creatures in the animal kingdom.

Big Cats are great, powerful, tough and strong. Big Cats are the king of beasts. They are the symbol of victory and strength and our \$BCAT community is the same.

WHY BINANCE SMART CHAIN?

Binance Smart Chain is one of the leading platforms for tokens. The key difference between BSC and alternatives such as Ethereum Smart Chain is the blockchain fees that are collected by miners to ensure that only valid transactions are recorded and processed on the blockchain.

Multitude of transactions can result in high fees. For example, Ethereum has recently recorded fees over \$100 for a single transaction. At the same time Binance Smart Chain charges range between \$0.10 - \$0.50 for the same transaction.

Another important factor to consider is transaction speed. Ethereum is affected by scalability challenges, which cause congestions on the blockchain and results in long waiting time and/or higher fees. The Binance Smart Chain resolves those scalability problems and it allows easy implementation of smart contracts to build scalable DApps.
